Summary

Frontend developer with hands-on experience building responsive, maintainable web applications using React, TypeScript, and Next.js. Starting from formal academic training, I have grown through real-world projects. Recently worked on a commercial Next.js project featuring server-side rendering, authentication, and reusable components. Passionate about crafting clean, user-friendly interfaces that balance performance, accessibility, and thoughtful design.

Skills

Frontend: HTML, CSS, SASS, Bootstrap, Tailwind CSS, JavaScript, TypeScript, React, Next.js, Redux Toolkit, Storybook

Backend (basic): Node.js, Express.js, MongoDB, REST APIs, JWT Auth

Tools: Git, Jira, Postman, GitHub Pages

Concepts: Server-Side Rendering (SSR), Component Architecture, State Management, Performance Optimization, Responsive Design, MVVM

Education

Bachelor of Engineering in Information Technology
Graduated — Continuously building production-level web applications across freelance, client, and team-based projects

Certifications & Courses

- React, NodeJS, Express & MongoDB- The MERN Full stack Guide (Udemy)
- The Complete JavaScript Course 2024 (Udemy)

Languages

- Persian (Native)
- English (Intermediate)
- Turkish (B2)

Experience

Frontend Developer | Confidential Commercial Project | 2024 – Present
- Developed Next.js commercial app focusing on server-side rendering, secure authentication, and reusable components.
- Delivered scalable frontend solutions using React and modern JavaScript.
- Collaborated with team using Jira and Git in Agile workflow.

Frontend Developer | Real-time Video Conferencing App (Client Project) | 2024
- Built Google Meet-like frontend with Next.js, React, and Redux Toolkit.
- Integrated webcam and mic streaming with browser APIs.
- Implemented SSR and secure authentication; project incomplete due to client.
- Applied MVVM architecture for clean, maintainable code.
- Used HTTP-only cookies and token validation for session management.
- Added middleware for role-based access control.

Frontend Developer | Custom Component Library (Client Project) | 2024
- Developed scalable, theme-adaptable React UI library using Tailwind CSS and TypeScript.
- Created reusable components and integrated Storybook for testing and documentation.
- Designed frontend architecture and implemented it independently.

Freelance & Independent Work | 2018 – 2024
- Delivered freelance projects including website maintenance, UI enhancements, and custom React solutions.
- Managed company website, improving SEO, performance, and user experience.
- Built personal projects:
  - **Travel Logging Web App**: Full MERN stack app with Google Maps API, JWT auth, secure uploads, and dark mode. Used React hooks and higher-order components. Backend with Express Validator and MongoDB.
    Demo and video walkthroughs available on portfolio.
  - **Online Store**: React e-commerce platform with REST APIs, cart, wish list, Sass styling, and persistent sessions.
    Demo and video walkthroughs available on portfolio.

Frontend Developer | Sunnyware (Freelance Contract) | 2016 – 2018
- Created responsive websites with HTML, CSS, Bootstrap, and jQuery.
- Customized WordPress themes and improved SEO and site speed.
- Worked directly with clients to implement updates.
