Summary

Frontend Developer with solid experience delivering responsive and maintainable web applications using React, TypeScript, and Next.js. Building upon a strong academic foundation, I've advanced through hands-on, production-level projects that emphasize clean architecture and scalable front-end systems. Recently contributed to a commercial Next.js platform with server-side rendering, secure authentication, and modular, reusable UI components. Passionate about creating performant, accessible, and visually consistent user experiences through thoughtful design and modern development practices.

Experience

Frontend Developer | CMorgh (Freelance Contract) | March 2024 – Present

- Developed production-level apps using Next.js, React, and TypeScript, focusing on SSR, secure authentication, and scalable UI architecture.
- Delivered theme-adaptable components using Tailwind CSS; integrated with custom libraries and Storybook.
- Collaborated in Agile teams using Jira and Git.
- Engineered frontend systems supporting dynamic data models and custom visualization scripts.

Key Projects at CMorgh:

- Real-time Video Conferencing App (Google Meet-like)
- Custom Component Library

Frontend Developer | Rayanpardaz Sepand Co. | April 2023 – March 2024

- Built responsive React apps with RESTful APIs and reusable components.
- Styled interfaces using Tailwind CSS and Bootstrap.
- Occasionally wrote backend code using Node.js and MongoDB for basic API tasks.

Freelance & Independent Work | 2018 – 2023

- Delivered freelance projects including website maintenance, UI enhancements, and custom React solutions.
- Managed company website, improving SEO, performance, and user experience.
- Built personal projects:
 - **Travel Logging Web App:** Full MERN stack app with Google Maps API, JWT auth, secure uploads, and dark mode. Used React hooks and higher-order components. Backend with Express Validator and MongoDB. [Demo](#) and [video](#) walkthroughs available on portfolio.
 - **Online Store:** React e-commerce platform with REST APIs, cart, wish list, Sass styling, and persistent sessions. [Demo](#) and [video](#) walkthroughs available on portfolio.

Frontend Developer | Sunnyware Co. (Freelance Contract) | 2016 – 2018

- Created responsive websites with HTML, CSS, Bootstrap, and jQuery.
- Customized WordPress themes and improved SEO and site speed.
- Worked directly with clients to implement updates.
- Built and maintained dynamic web pages using ASP.NET and SQL for data-driven functionality.

Skills

Frontend: HTML, CSS, SASS, Bootstrap, Tailwind CSS, JavaScript, TypeScript, React, Next.js, Redux Toolkit, Storybook

Backend (basic): Node.js, Express.js, MongoDB, REST APIs, JWT Auth

Tools: Git, Jira, Postman, GitHub Pages

Concepts: Server-Side Rendering (SSR), Component Architecture, State Management, Performance Optimization, Responsive Design, MVVM

Other Skills: Technical SEO, Google Analytics, PageSpeed Optimization

Education

Bachelor of Engineering in Information Technology

Certifications & Courses

- React, NodeJS, Express & MongoDB- The MERN Full stack Guide (Udemy)
- The Complete JavaScript Course 2024 (Udemy)

Languages

- Persian (Native)
- English (Intermediate)
- Turkish (B2)
